

Judith Prays

Engineering Leader | AI & Product Engineering | Customer-Facing Applications

Sandy Springs, GA · 562.537.6220 - judithprays@gmail.com

SUMMARY

10+ years of software development experience building customer-facing products from 0→1

2+ years hiring, lead and managing cross-functional engineering teams

Strong frontend with experience in AI-powered products, experimentation, R&D and engineering

EXPERIENCE

Splice — Engineering Manager, Marketing Engineering | 2024–2026

- Led product engineering for Splice's logged-out customer experience, partnering across Product, Design, Marketing, Data, and Engineering.
- Shipped **100+ A/B experiments**, redesigns, GTM experiences, migrations, and platform improvements driving customer acquisition.
- Built scalable landing page infrastructure enabling teams to launch performant experiences quickly.
- Translated ambiguous requirements into clear technical plans and executable milestones.
- Drove AI adoption across engineering while mentoring engineers and removing technical and organizational blockers.

Splice — Senior Software Engineer | 2020–2024

- Launched **Create**, an AI music creation product, from 0→1.
- Launched **Skills**, an education platform, from 0→1.
- Partnered with Product, Design, Data, and Engineering to translate product concepts into scalable technical solutions.

Agency / Product Engineering | 2014 - 2020

- Built digital products and experiences for clients including **Coca-Cola, Whole Foods, and RED Camera**.
